Wearing E59

Love charm, Protection from Evil

**Caring for your BICO product:**

BICO metal products are plated with various layers of silver, gold, brass, or copper then specially coated with a clear layer. This special layer extends the life of the plating. Chemicals used in traditional jewellery cleaning methods must not be used when cleaning your BICO product. BICO recommends gently rinsing your product in warm water and drying it with a soft cloth. In general, sensible care will ensure a long life for your product.

BICO Australia products are nickel free.
